

Poll Parrot

Joseph Younan

May 4 2021

1 Requirements

To be able to run this application, you require an android device (phone/tablet) that is able to connect to the Google Play Store. Another way to run the application is to download BlueStacks: <https://www.bluestacks.com/download.html> and run the apk from there. More information about this is in the Installation manual section.

This is not required, but to report bugs please install the Discord application on your phone through the Google Play Store. More information available in the Bug Reports section.

2 User/Technical manual

Create Poll

To create a poll, select "Create Poll" in the main menu. Enter a question in the question field, specify the 6 digit pin, and after adding all your desired options for choices, select create poll. As of v3, you must join the poll after you create it. See Join Poll section.

Join Poll

To join a poll, select "Join Poll" in the main menu and enter the six digit pin of the poll you want to join. Note: Only the creator of the poll will see the "End Poll" button.

Poll History

To see poll history, simply select "Poll History" in the main menu. Each card will show the date and time a poll was created, with the poll question and result.

Bug Reports

To report a bug, hit the Discord icon on the bottom right of the main menu. When you are in the server, navigate to the #bug-reports section to report a bug. Thank you!

3 Installation manual

With your android device, connect to the Google Play Store and search "Poll Parrot", with author: jy15gt and hit download.

With BlueStacks, hit the install apk icon on the rightside menu (or Ctrl+Shift+B), locate the PollParrot.apk and hit Open.

The apk is available on: <https://github.com/jy15gt/Poll-Parrot>
