# Progress Report #1

Phase #1

- **Design**
  - ➢ Main Screen consists of New Poll, Poll History, and Settings menu.
  - ➢ New Poll consists of the poll in question, and the ability to add an infinite amount of choice selections.
  - ➢ Poll History to view recent polls and their results.
  - ➢ Settings to toggle options like anonymity and the ability for users to add choices to an ongoing poll.
- **Implementation**
  - ➢ Main Screen:

➢ New Poll:

➢ Poll History is a blank page currently. Until I am able to create a new poll, poll history will remain this way.

➢ Settings Menu:

- **Test**
  - ➢ Test features cannot be fully implemented this early but so far navigation works well, and the program is ready to develop with full functionality.

Release #1

- **Iteration #1**
  - ➢ Iteration 1 of the first release consisted of all the menus such as the main page, new poll, and poll history.
- **Iteration #2**
  - ➢ Added the settings menu, along with navigation and button functionality.

<u>Future Plans</u>

Release #2

- Add ability to create poll, and vote on that poll based off the given choices.

Release #3

- View Poll history fully functional

Release #X

- Fix design and implement settings functionality.
